

Features:

The ScholarChip 1098T/GetMyDocument process is noted for many unique features:

Handles millions of documents securely with our scalable PCI-certified applications.

Can import school data from most back-end management systems, via file and web services exchange.

Supports both a management site for schools to handle all 1098T generation and reporting needs as well as a student portal for viewing and downloading tax documents.

The student portal is noted for its security and rapid and secure authentication and download.

The ScholarChip web services API allows schools to integrate the process with all e-Campus portals.

Documents can be viewed both on the ScholarChip portal and on the school's student portal.

Integrated IRS eFile reporting eliminates the need for the school to report either manually or electronically to the IRS.

Choose the ScholarChip 1098T process for cost-reduction, security and robust reporting.

Advantages:

Reduced operational costs

Improved service to students

Enhanced cash flow

ScholarChip® 1098T e-Processing

The Taxpayer Relief Act of 1997 (TRA-97) and the Internal Revenue Code require all educational institutions to file a 1098T form for any enrolled student who has made any transactions toward tuition or fees. The traditional process of paper reporting is both expensive and time consuming for schools. The ScholarChip 1098T process, a sub-module of the ScholarChip GetMyDocument platform, is a proven way to reduce paper costs and increase efficiency. In many cases schools utilizing the ScholarChip 1098T process have seen an 80% reduction in paper generation and mailing.
